PROFESSIONAL SUMMARY

IT professional with production experience across software development, systems support, and operations. Background spans full-stack development on a large-scale SaaS platform, a major ERP transition, and ten years in a regulated laboratory environment. Comfortable working across technical and non-technical teams, diagnosing and resolving system issues methodically, and maintaining accurate records and documentation throughout.

CORE COMPETENCIES

Languages & Frameworks: Go • JavaScript / TypeScript • Python • SQL • C++ • React • Node.js • GraphQL • gRPC • REST APIs

Infrastructure & DevOps: Docker • Kubernetes • AWS (Lambda, API Gateway, S3) • GitHub Actions CI/CD • Linux

Diagnostics & Testing: Log analysis • API response analysis • SQL querying • Vitest • Supertest • MSW • Cypress

Operations & Systems: ERP systems and transitions • data validation and reconciliation • change management • process documentation

Tools & Workflow: Git • Asana • Jira • Agile / Kanban • technical documentation • cross-functional collaboration.

EXPERIENCE

Software Developer (Capstone – Junior Developer)

Dyspatch | Victoria, BC | May 2025 – Dec 2025

Contributed across the full development lifecycle of Dyspatch's email builder platform within a large-scale production monorepo.

- Built a replacement internal admin dashboard using React, GraphQL, and gRPC, delivering organization and user management, search and filtering, and role-based SSO.
- Designed and implemented a new DML email component end-to-end in Go, developing a dual-rendering approach to support modern email clients and Outlook with no established pattern to reference.
- Built LLM documentation infrastructure including Nginx bot routing and a markdown generation script to improve how AI tools access and navigate Dyspatch's documentation.
- Worked across Go, Node.js, GraphQL, gRPC, React, and TypeScript within a Docker/Kubernetes/AWS stack deployed via GitHub Actions CI/CD.
- Diagnosed and resolved issues across integrated services using logs, API responses, and SQL queries; wrote Cypress, Vitest, MSW, and Supertest tests.

Technical Trainer (Contract)

Island Farms – Agropur | Victoria, BC | July 2024 – August 2024

- Delivered hands-on training for planning tools to supervisors and operations teams with varying levels of technical comfort.
- Created user-facing documentation to ensure staff could confidently navigate system workflows after handover.

Operations Performance Management Supervisor

Island Farms – Agropur | Victoria, BC | Jan 2022 – Jun 2023

- Supported a major ERP transition (Oracle to SAP): validated system outputs, identified data discrepancies, and coordinated with IT and operations teams to resolve issues and maintain continuity during cutover.
- Acted as the operational bridge between end users and IT, investigating system and data inconsistencies across platforms, diagnosing root causes, and tracking issues through to resolution.

- Participated in business user workshops and supported change management activities, ensuring alignment between system configuration and operational requirements.
- Built a custom Excel/VBA tool that improved visibility into ingredients and planning data, directly supporting cross-team decision-making and reporting.
- Produced management reporting and maintained data accuracy across systems throughout a period of significant operational and system change.

Production Office Clerk

Island Farms – Agropur | Victoria, BC | Feb 2020 – Jan 2022

- Maintained ERP logistics data, produced management reports, and resolved day-to-day system and data discrepancies.

Microbiology Department Supervisor

MB Laboratories | Sidney, BC | Jul 2009 – Nov 2019

- Managed QA documentation, environmental testing workflows, and audit readiness across a regulated laboratory environment.
- Supervised staff and maintained accurate records in compliance with quality and safety standards.

EDUCATION

Sept 2023 – Aug 2025 **Diploma in Information and Computer Systems Technology**
Camosun College - Victoria, BC – 2025

Sept 2000 – Jul 2005 **Bachelor of Science with Honors in Microbiology**
University of Havana, Cuba – 2005

CERTIFICATIONS

Google Cybersecurity Professional Certificate – Completed 2026.

Coursework included: Linux, SQL, Python, network security, incident response, risk management, and secure systems design.

Microsoft Azure Fundamentals (AZ-900) – Completed 2026.

INTERESTS

Cloud-native systems • Network infrastructure • Systems support • Backend reliability • Automation and tooling
